## INTERNAL CONTROL & PROCESSES

### I. OVERVIEW OF INTERNAL CONTROL AND PROCESSES DEPARTMENT MISSION

According to the Committee of Sponsoring Organizations of the Treadway Commission (COSO) framework applied by Sanofi, Internal Control is defined as a process, carried out by an entity's Board of Directors, management, and other personnel, designed to provide reasonable assurance regarding the achievement of objectives in the following categories:

- Effectiveness and efficiency of operations
- Reliability of financial and management information/reporting
- Compliance with applicable laws, regulations and Sanofi policies.

Although, the risks associated with the Company activities cannot be totally eliminated, Internal Control aims at providing reasonable assurance that the organization achieves its objectives.

The mission of the Sanofi Internal Control and Processes (IC&P) Department is to support the company with its objectives to have an Internal Control adapted to its organization and activities, by:

- Defining and maintaining company-wide standards.
- Providing support to management for improving controls and remediating failures.
- Coordinating the evaluation of Internal Control over Financial Reporting, program effectiveness.

### II. GROUP PROCESSES & STANDARDS – “GPS”

Sanofi senior management has a clear ongoing commitment to maintaining and enhancing its systems of internal control and risk management. In furtherance of this objective, in 2014 senior management launched the Global Processes and Standards (GPS) program, which combines the existing elements of internal control into a unified company-wide approach. GPS has been approved by the Executive Committee and presented to the Audit Committee.

GPS comprises the following elements:

- A Global Process Framework, presenting the Sanofi's operational and support processes with a three-level hierarchy: processes, sub-processes and topics.
- An Internal Control Manual, made up of two parts. First, it describes the organization and GPS, and second, it details Sanofi's mandatory controls (which include the Severe Impact Controls, SIC) applicable to all activities in all countries. These controls are essential to reduce many of the Sanofi's critical risks to an acceptable level.
- A Financial Controls Framework, presenting Sanofi's internal control over financial reporting (used to comply with Section 404 of the Sarbanes-Oxley Act, "SOX"). This framework is an integral part of the Internal Control Manual;
- An Internal Control Self-Assessment and Self-Testing process to be completed annually by all the Global Business Units and Global Functions in countries, based on a risk and materiality assessment. Its outcome can be reviewed by Sanofi Internal Audit during its periodic audits, as well as senior management in their monitoring of activities and decision making process

The GPS applies to all business units, functions and activities, in all countries.

### III. INTERNAL CONTROL RESPONSIBILITIES

The Executive Committee sets principles and policies for the Sanofi's Internal Control, allocates resources, and monitors adherence to the company's Internal Control by local management teams.

The Audit Committee of the Board of Directors is responsible for monitoring the effectiveness of the enterprise's risk management and internal control systems including Internal Control over Financial Reporting.

The IC&P Department assists the company to implement its Internal Control, and as such:

- Maintains the Sanofi Internal Control Manual and respective tools,
- Follows up and provides guidance on the local implementation of policies, processes and controls developed at Global level,
- Monitors the GPS implementation and reports deviations to the Executive Committee and the Audit Committee,
- Supervises and monitors implementation of action plans on internal control issues including internal audit recommendations and escalates when needed,
- Acts as subject matter experts in projects and other initiatives,
- Coordinates and prepares the self-assessment and self-testing campaigns and the evaluation of the effectiveness of Internal Control over Financial Reporting for Group Management.

Management:

- Is accountable for internal control environment within their area of responsibility,
- Ensures that an internal control system including organization, procedures exists in all operations, and that such a system is documented, understood and adhered to by all employees. Ensures roles and responsibilities and control ownership are defined and communicated through RACI or other means.
- Takes corrective and disciplinary actions in case of non-compliance with internal control requirements.

Sanofi Internal Audit:

- Provides the Executive Committee and the Audit Committee with reasonable assurance as to Sanofi's ability to exercise control over the risks associated with its operations,
- Performs periodic audits of controls and processes (including but not limited to those described in the Internal Control Manual) and monitors that action plans identified during their assignments are implemented within the specified timeframes.
